Patient Gown

The patient gown is an efficient tool for doctors and patients to ensure that the treatment and care processes are conducted in the best possible way. This vital item is made of Spunbond woven fabric, with a standard weight of 38 grams and dimensions of 110 by 160 cm, available in dark blue or light blue for easy access to the patient during examination or surgery.

Surgeon Gown

The elastic-cuffed surgeon gown is another necessary and essential tool in healthcare centers. With its unique design, it acts as a sterile cover for the surgical team. The 38-gram gown with dimensions of 120 by 160 cm, made of Spunbond woven fabric, is available in light and dark blue.

Disposable Drapes

Sterile disposable drapes, made from Spunbond fabric, weigh 38 grams, and are highly absorbent and sterile. They are available in three different sizes: 50 by 50 cm, 80 by 80 cm, and 100 by 100 cm, providing a reliable and valuable option for medical teams and healthcare centers.

Accordion Cap

The accordion cap is a type of hygienic, disposable cap made of Spunbond fabric, which makes it thin and waterproof. These caps weigh 10 grams, are white, and are one-size-fits-all. With a beautiful design and high quality, they are an efficient and reliable choice for maintaining hygiene by the general public in medical and healthcare centers and similar environments.

Disposable Sheets

The 25-gram fitted disposable sheets with dimensions of 80 by 220 cm are an ideal choice from Pakan Teb. They are economical and efficient for healthcare centers, doctors' offices, hospitals, beauty salons, and any other environment where comfort and hygiene are essential.

Sheet Rolls

Sheet rolls are another essential piece of equipment in all healthcare centers and beauty salons, helping to maintain more order and hygiene. They significantly aid in preventing the spread of infections. These sheets are produced in roll form with perforations, measuring 60 by 80 cm and with a length of 20 meters. They enhance the health and comfort of both customers and staff.

Disposable MRI Set

The disposable MRI set is a smart choice for individuals undergoing an MRI process. This 38-gram garment made of Spunbond fabric is specially designed to provide comfort and security during imaging and is suitable for all body sizes.

Various Disposable Gloves

Disposable gloves are one of the most important and widely used medical and laboratory equipment, designed and produced in various materials and sizes. The most important and commonly used disposable medical gloves include:

- Latex Gloves

Latex gloves are an essential tool for protecting hands in many everyday and professional activities. These gloves are made of latex and are available in both powdered and powder-free varieties.

Powdered gloves prevent hands from sticking to the inside of the glove, providing comfort for the user. However, to avoid skin sensitivity, powder-free latex gloves can be used.

Latex gloves come in various sizes and are designed for use in hospitals, clinics, workshops, laboratories, and even kitchens to maintain hand hygiene.

- Nitrile Gloves

Nitrile gloves are made without synthetic rubber and are very resistant to tearing or puncturing with sharp medical instruments.

Available in various sizes and colors, nitrile gloves can be used in laboratories and beauty salons.

- Vinyl Gloves

Vinyl gloves are plastic, colorless, non-allergenic, and somewhat non-stick, making them a reliable and excellent choice for preventing the spread of infections and maintaining hand hygiene during any activity and medical examinations.

Various Work Gloves

- Palm-coated Gloves

Palm-coated gloves are essential in various industries for protecting hands against different hazards. They help prevent physical, biological, or thermal damage and avoid diseases and injuries from direct contact with hazardous materials.

- Cut-resistant Gloves

Cut-resistant gloves are an essential tool for ensuring safety and a type of personal protective equipment specifically designed to protect hands from cuts or tears caused by contact with cutting machines, equipment, tools, or various items with sharp edges such as saws, knives, blades, metals, and glass. They are available in both long and short sizes and are washable.

- Acid-resistant Gloves

Acid-resistant gloves, available in long and short sizes, are essential for those working with chemicals and acids. These gloves feature a PVC coating resistant to acidic, alkaline, chemical, and biological substances, protecting hands from harm.

- Dotted Welding Gloves

Dotted welding gloves are a vital tool for maintaining safety and efficiency in various industrial activities such as construction, engineering, manufacturing and assembly, automotive and mechanical work, warehousing and logistics, gardening, and landscaping. These gloves are made from thick cowhide or high-resistance synthetic wool, designed in various sizes to better fit the hands of different users. They are available in both long and short lengths and are produced in compliance with international quality standards and regulations.

- Butcher Gloves

Butcher gloves are essential tools for maintaining hygiene and safety in the meat industry and butchery processes.

These gloves come in various sizes, have appropriate hygiene certificates, and comply with international standards.

- Kitchen Gloves

Kitchen gloves are a plastic layer that protects hands and fingers from chemicals and contaminants. These gloves are ergonomically designed and attractive, made from high-quality materials to ensure they are comfortable and suitable for any hand size. Available in various sizes, they are ideal for export to international markets and comply with international health standards.
